

## INSTALLATION MANUALS

Dear customer,

In this product ToolTip we bring you information about the new technical documentation. A major change, visually and content have undergone installation manuals for industrial doors. We created it based on your comments, to accelerate and facilitate your work as a comprehensive view of the entire course of the assembly in the form of detailed instructions describing the various installation steps.

### Manuals are:

- Prepared for: HL, HL-T, SL, VL, VL-T, LL-CE, LL-DT
- In language versions: CZ, DE, EN, FR
- downloadable from our website

We believe that the use of assembly documentation significantly reduces gates installation time and will help reduce the number of complaints and help remove any confusion components.

We strive to be an environmentally responsible company. A detailed installation manual therefore will not be sent automatically. It is available on our website. If you want to be still sent together with van gates, this service costs € 3.90.

Simplified manual remains the standard of delivery gates. Also contains QR code through which you can download a detailed manual directly to your mobile phone.
