

STOPPER OF DOOR BLADE

FOR MANUALLY OPERATED GARAGE DOORS

Dear customer,

we broaden our configuration of manually operated garage doors TOORS GUARDY (EXT, LHR-C, LHF-C) with a stopper of the door blade.

This solution increases clear passing height, which is equal to opening height, and therefore prevents overlapping of door blade to the opening space.

Door blade stopper is produced from first-rate spring steel, ensuring its high lifespan. The stopper is delivered with fixing components.

Price of stopper set with doors: 4,90 EUR brutto

Set includes: 2x door blade stopper, 4 x bolt M8x16, 4x nut M8

Article ID for catalogue of spare parts: T09-005-0089
