

SEALING ON THE LINTEL

NEW STANDARD FOR RESIDENTIAL DOORS WITH TORSION SPRINGS

Dear customer,

we are changing standard configuration of residential doors. New default specification will be sealing on the lintel instead of sealing on the top section. This change will be applied for orders received from 16. 11. 2018.

New sealing on the lintel has better thermal insulation performance. This change brings the same design look of the sealing on the sides and also on the lintel.

Top sealing on the section is still available on the request and has to be specified on purchase orders.

Lintel sealing is produced from co-extruded PVC. Top part is from hard material to keep the shape and make installation easy. Soft bottom part provides good sealing of the top section and very good thermal insulation.

ARTICLE NUMBERS OF THE LINTEL SEALING:

Length	Art. number
2510 mm	T09-020-20-0017
3010 mm	T09-020-20-0018
4010 mm	T09-020-20-0019
5510 mm	T09-020-20-0020

ARTICLE NUMBER OF THE SEALING ON THE TOP SECTION:

T09-020-10-0002
